Strategy Mandate

Investment Strategy Provider:
Mint Platforms (Pty) Ltd (Registration Number: **2024/644796/07**) trading as **MINT** ("Mint" or "the Manager"), with its registered address at **3 Gwen Lane, Sandown, Sandton, Johannesburg, Gauteng, South Africa**, provides investment strategy design and portfolio management services through managed investment strategies available on the Mint platform.

Mint offers **investment strategies and managed portfolios**, and not collective investment schemes or pooled funds unless explicitly stated otherwise.

This information does **not constitute financial advice** as defined in the **Financial Advisory and Intermediary Services Act, No. 37 of 2002 (FAIS)** and is provided for informational purposes only. Investors should seek independent financial advice prior to making investment decisions.

Mint may have representatives acting under supervision where applicable.

Custody and Asset Safekeeping

Client assets are held in custody through **Computershare Investor Services (Pty) Ltd**, a Central Securities Depository Participant (CSDP), with securities held through its nominee structure **Computershare Nominees Proprietary Limited** (Registration Number: 1999/008543/07).

Computershare Investor Services (Pty) Ltd
Rosebank Towers
15 Biermann Avenue
Rosebank
Johannesburg
2196
South Africa

Computershare acts as the custodian and record keeper of securities held through the platform. Client assets remain segregated from the operating assets of Mint.

Nature of Investment Strategies

Investment strategies offered on the Mint platform are **actively managed portfolios** where Mint may **rebalance, adjust or change portfolio allocations on behalf of clients** in accordance with the stated strategy mandate.

Rebalancing and portfolio adjustments may occur **at the discretion of the investment manager and at any time**, including but not limited to:

- strategic reallocation
- tactical positioning
- risk management adjustments
- optimisation of portfolio exposures

These strategies are designed to align with defined investment objectives and risk parameters.

Performance Disclosure

Performance information presented may include:

- **historical realised performance**, and
- **back-tested or simulated performance results**.

Back-tested performance is based on historical data and simulated portfolio construction and **does not represent actual trading results**.

Back-tested results have inherent limitations because:

- they are constructed with the benefit of hindsight
- they do not reflect the impact of actual trading conditions
- they may not account for market liquidity constraints, slippage, or real-world execution costs.

Past performance, whether actual or simulated, **is not necessarily a reliable indicator of future performance**.

Performance shown is **gross of management and performance fees unless otherwise stated**.

Individual investor performance may differ depending on:

- timing of investment
- deposits or withdrawals

- transaction costs
- custody costs
- taxes applicable to the investor.

Fees and Charges

The following fees apply to managed investment strategies offered through Mint:

Performance Fee
A performance fee of **20% of investment profits** generated by the strategy applies.

Mint does not charge a management fee or AUM-based fee.

Performance fees are calculated based on the net profits generated by the strategy over the relevant performance measurement period.

Transaction Fees
A transaction fee of **0.25% per transaction** applies to trades executed within a portfolio.

Custody Fees
Custody and administrative fees charged by the custodian may apply and will be **displayed transparently at checkout prior to investment confirmation**.

A full schedule of fees, charges and transaction costs is available on request from Mint.

Investment Risk Disclosure

Investment strategies offered through the Mint platform are subject to market risk.

The value of investments may **increase or decrease**, and investors may **lose part or all of their invested capital**.

Investment performance may be affected by a variety of factors including but not limited to:

- equity market volatility
- interest rate changes
- currency fluctuations
- macroeconomic conditions
- geopolitical developments
- liquidity constraints
- changes in regulatory or tax environments.

Where strategies include **foreign investments**, performance may also be affected by:

- foreign exchange risk
- political and regulatory risk
- settlement risk
- international market volatility.

Liquidity and Withdrawal Considerations

Investments in Mint strategies are subject to market liquidity.

In circumstances where large withdrawals occur or where underlying market liquidity is constrained, withdrawal requests may be **processed over time to ensure orderly portfolio management and investor protection**.

Conflicts of Interest and Fair Treatment

Mint is committed to **fair treatment of all investors**.

No investor will receive preferential fee or liquidity terms within the same investment strategy unless explicitly disclosed.

Where commissions or incentives are payable to third parties, such arrangements will be disclosed in accordance with applicable regulatory requirements.

Additional Information

Additional information regarding Mint's investment strategies, including:

- strategy descriptions
- risk disclosures
- fee schedules
- investment methodology
- portfolio construction framework

is available on request from Mint.

Disclaimer

This document is confidential and issued for the information of the addressee and clients of **Mint Platforms (Pty) Ltd (Registration Number: 2024/644796/07) trading as MINT** ("Mint" or "the Manager") only. It is subject to copyright and may not be reproduced, distributed or published in whole or in part without the prior written permission of the Manager.

The information, opinions, methodologies and strategy descriptions contained herein are provided for informational purposes only and must be construed solely as statements of opinion and not statements of fact. While the Manager believes the information contained in this document to be reliable, no representation or warranty, express or implied, is given as to the accuracy, timeliness, completeness or suitability of any information contained herein.

The Manager makes no representation or warranty that any investment strategy described in this document will achieve its stated objectives or generate profits. All investments carry risk, and investors may lose part or all of their invested capital.

This document may include **simulated, modelled or back-tested performance results**. Back-tested performance is hypothetical and is provided for illustrative purposes only. Such results are based on historical data and assumptions applied retrospectively with the benefit of hindsight. Back-tested performance does not represent actual trading and may not accurately reflect the impact of market factors such as liquidity constraints, slippage, transaction costs, market disruptions or changing market conditions. Accordingly, actual investment results may differ materially from back-tested or simulated results.

Performance figures presented are **gross of fees unless otherwise stated**. Actual investor returns will be affected by applicable fees, transaction costs, custody charges and taxes.

Investment strategies referenced herein are **managed strategies offered through the Mint platform and are not collective investment schemes or pooled investment funds unless explicitly stated otherwise**. Investors participate in strategy allocations through their own accounts where portfolios may be **actively managed and rebalanced by the Manager on behalf of the investor** in accordance with the strategy mandate.

Each opinion, strategy description or recommendation contained in this document must be considered solely as one factor in any investment decision. Any person considering an investment should conduct their own independent investigation and analysis and should seek advice from their own professional financial, legal, tax or investment advisers before making any investment decision.

This document does **not constitute financial advice, an offer to sell, a solicitation of an offer to buy, or a recommendation to invest in any security, financial instrument or investment strategy**. Nothing in this document should be construed as advice as defined in the **Financial Advisory and Intermediary Services Act, No. 37 of 2002 (FAIS)**.

The Manager accepts **no liability whatsoever** for any direct, indirect or consequential loss arising from the use of, or reliance on, any information, statement, opinion or strategy described in this document.

Investment strategies may be modified, updated or withdrawn at the discretion of the Manager without prior notice.

Strategy Risk Factors

Investment strategies offered through the Mint platform are subject to a range of risks which may impact portfolio performance and capital values. Investors should carefully consider the following risk factors before investing.

Market Risk

Investment strategies are exposed to general market movements. The value of financial instruments may fluctuate due to changes in economic conditions, interest rates, political developments, inflation expectations, and global financial market conditions. Market volatility may cause the value of a portfolio to rise or fall.

Equity Risk

Strategies that invest in equities are exposed to fluctuations in share prices. Equity prices may decline due to company-specific factors such as earnings performance, management decisions, competitive pressures, or broader economic and sector conditions. Equity investments may experience periods of significant volatility.

Volatility Risk

Volatility refers to the degree of variation in the price of an instrument or portfolio over time. Strategies that pursue higher return objectives may experience greater volatility. Rapid changes in market conditions may result in short-term fluctuations in portfolio value.

Derivative Risk

Certain strategies may utilise derivatives or structured instruments to obtain market exposure or manage risk. Derivatives derive their value from underlying assets and may be more sensitive to market changes than traditional securities. The use of derivatives may amplify both gains and losses.

Leverage Risk

Some strategies may utilise leverage to enhance exposure to investment opportunities. Leverage magnifies both potential gains and potential losses and may increase portfolio volatility. Where leverage is employed, adverse market movements may result in amplified losses.

Liquidity Risk

Liquidity risk arises when securities cannot be bought or sold quickly enough to prevent or minimise losses. In certain market environments, liquidity may deteriorate and the execution of trades may occur at prices that differ from expected levels.

Counterparty Risk

Counterparty risk refers to the risk that a financial institution or trading counterparty may fail to fulfil its contractual obligations. This may arise in relation to derivative contracts, settlement arrangements or other financial transactions.

Concentration Risk

A strategy may at times hold concentrated positions in particular securities, sectors, asset classes or geographic regions. Concentration can increase the sensitivity of the portfolio to events affecting those positions and may result in higher volatility.

Correlation Risk

Correlation risk arises when investments that are expected to behave differently move in the same direction during periods of market stress. This may reduce the diversification benefits within a portfolio and may increase overall portfolio volatility.

Foreign Market Risk

Where strategies invest in international securities, performance may be affected by foreign exchange movements, regulatory changes, political developments, taxation differences, and settlement risks in foreign jurisdictions.

Strategy Risk

Investment strategies are constructed using defined models, methodologies and portfolio construction techniques. There is no assurance that the strategy will achieve its intended investment objective. Market conditions may change in ways that reduce the effectiveness of a strategy.

Rebalancing Risk

Mint actively manages and rebalances portfolios on behalf of investors in accordance with the strategy mandate. Portfolio adjustments may occur in response to changing market conditions or strategy signals. While rebalancing is intended to maintain portfolio alignment with strategy objectives, it may result in transaction costs and may not always produce favourable outcomes.

Model and Back-Test Risk

Certain strategies may rely on quantitative models, historical analysis or back-tested simulations. Back-tested results are hypothetical and constructed using historical data with the benefit of hindsight. As a result, actual investment outcomes may differ materially from simulated results.
